

# Assembly and Installation Instructions

## TUB / SHOWER ENCLOSURE MTE / MSE 1400-4

For assembly you will need:

1. Level
2. #31 Drill Bit
3. 3/16" Carbide Drill Bit (for tile walls)
4. Phillips Screwdriver
5. Silicone
6. Hack Saw
7. 1/4" Box End Wrench

When Ordering Repair Parts, Please Give The Following Information:

1. Model Number
2. Part Number
3. Part Description
4. Color

Description	Qty.	Part #	Picture
1. Wall Jamba	2	MTE1203	
2. Wall Anchors	11	ANCHOR	
3. #8 x 1 1/2 SMS Screws	11	MBG812-SMA	
4. Door Bumpers	2	MBG-924	
4a. Bottom Bumper	1	MBG-926	
5. 6-32 x 1/2" MS Screws #6 x 1/2 TC	2	MBG612-TC	
6. Bottom Sill (with MV-918)	1	MTE1522	
7. Center Guide - 3"	1	MBG-530-3	
8. Headers - Mitered	3	MTE1201	
9. Towel Bar Bracket	1	MTE1206	
10. Towel Bar Bracket With Pull	1	MTE1206P	
11. Towel Bars	2	MTE1205	
12. Inside Door Pull	1	MTE1207	
13. #6 x 3/8 SMS Screws	10	MBG638-SM	
14. Handle Vinyl	3	MV-916	
15. Roller Bracket Assembly	4	MTE1208-F	
16. Inside Glass Panel	1	Inside Slider	
17. Outside Glass Panel	1	Outside Slider	
18. Door Guide Vinyl (with MTE1522)	1	MV-918	
19. 135-Degree Post	1	MTE1215	
20. Curb Channel	1	MD11006	
21. Wall Channel	1	MD11006	
22. Post To Curb Key	3	MBG180-316	
23. Post To Header Clip	2	MBG90-1516	
24. Glass Support Block	3	MV-902	
25. #6 x 1/4" SMS B Screws	2	MBG614-SM	
26. 90-Degree Glass Panel	1	90PANEL	
27. 135-Degree Glass Panel	1	135PANEL	
28. Vertical Seal Vinyl	12	MV-909	
29. 135-Degree Header Clip	4	MBG1353132	
30. 135-Degree Post	1	MSS1105	
31. Header Retainer Clips	2	MV-952	

# Assembly and Installation Instructions

**Note:** Apply a bead of silicone (GE1200) into the open channel of roller brackets before attaching to glass. To assemble roller bracket (15) to glass, tighten screws until surface of roller bracket is depressed 1/32" (28 incho pounds of torque). Allow to cure for 24 hours before hanging sliders.

**Figure 1**

**Figure 2**

1. Draw a line on center of rim of tub or curb. Draw a parallel line 3/4" to outside of center line. This new line represents the outside dimension of the unit. Use this line for placement and cutting of 90-degree curb channel and 135-degree curb channel.

2. Measure out from wall (end panel side) to intersection of diagonal panel, deduct 15/16" and use this measurement to cut 90-degree curb channel to length. Apply a bead of silicone full length to underside of curb channel and set in place (weep holes to inside).

3. Set wall channel (21) in place on curb channel, hold plumb and mark wall for screw hole locations. Drill holes and insert plastic screw anchors (2). Fill curb channel with silicone where curb channel meets wall, set wall channel (21) in place and secure with #8 x 1/2" screws (3). Secure header clip (23) to top inside leg of wall channel with a #6 x 1/4" SMS (25).

4. Place glass support blocks (24) in place in 90-degree curb channel. Set panel (26) in place in curb channel and wall channel. Hold in place, at top only, with vertical seal vinyl (28).

5. Silicone curb where 135 post (30) will set. Insert post to curb key (22) into end of 90-degree curb channel and set post in place over edge of panel. Hold plumb and secure in place, at top only, with small wedge vinyl. Secure header clip (23) with a #6 x 1/4" screw (25).

6. Measure from post to point where diagonal and front curb lines meet. Deduct 7/8" from this measurement to cut 135-degree curb channel to length. If contoured surface of 135 post is on this center panel, compress short legs of post to curb key about 1/16" and drop down into position from the top of the 135 post, secure 135-degree curb channel in place just like 90-degree curb channel. Place a glass support block (24) in place in curb channel. Set panel (27) in curb channel and 135 post. Hold in place, at top only, with small wedge vinyl. Insert post to curb key (22) into end of curb channel.

7. Silicone curb where 135 slider post (19) will set. Set post in place over edge of panel, hold plumb, and secure in place, at top only, with small wedge vinyl (28).

8. Set jamb (1) in place at wall opposite end panels, hold plumb and mark screw hole locations. Drill holes in wall and insert plastic screw anchors (2). Apply silicone where curb meets wall, set jamb in place and secure with a #8 x 1/2" SMS (3). Secure bottom bumper with bottom jamb screw.

9. Measure from inside of jamb to inside of 135 post slider post (19) and use this measurement to cut guide to length. Slide or snap center guide onto guide to one side of center. Run bead of caulk full length to underside of guide also to inside of jamb and post to seal ends of guide, then press guide firmly in place.

10. Cut center section of header (8) to length and assemble header using 135 clips (24) and #6 x 3/8" SMS (13). Cut header to length and set in place over jambs, post and wall channel. Secure header to jamb and slider post with #6 x 3/8" screws from inside of shower also to 135 post and wall channel with #6 x 3/8" screws. Insert vertical seal vinyl into wall channels, post and curb channels on both sides of panels.

11. Secure bumpers (4) with 6-32 x 1/2" screws (5). Raised portion of bumper to outside at shower head side to inside at post. Center hole in jamb is slotted to allow jamb to be moved in or out to compensate for bowed glass.

12. To set slider glass in place, hold inside slider panel (16) inside of tub or shower pan, insert rollers up into header and lower into place. Next, insert lower end of outside slider (17) in front of inside slider by pushing lower ends far enough in to allow clearance on inside edge of tub or pan. Avoid roller bracket to roller bracket contact while lifting panel into place. The outside slider will close against the jamb opposite the showerhead.

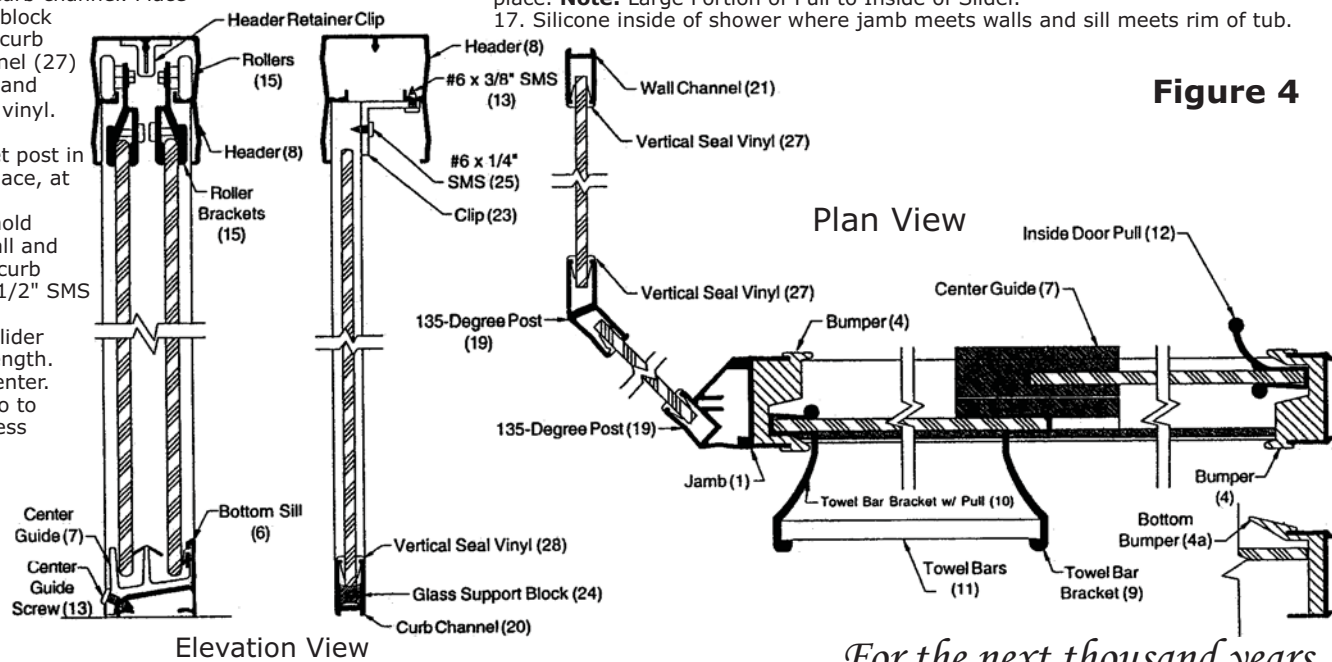

13. Place center guide (7) to center position on sill (6). Make sure the center guide is hooked into the slot position on the sill, then drill a hole using a #31 drill bit and fasten center guide to sill with the #6 x 3/8" screw (13) provided.

14. Close panels and adjust to align the vertical edge of panels with jamb and post. Using a 1/4" box-end wrench, loosen the screws on the rollers, but don't remove completely. When screws are loose, adjust panel by sliding the screw in the slot. **Note:** When screws are loose be sure to support panel so it does not fall and break. Adjust inside slider as low as possible to reduce the gap between bottom of slider and sill taking care that the glass does not drag on the track or center guide. Adjust for bowed glass by using the slotted hole in the jamb. Secure bumpers to the jambs using 6-32 x 1/2" screw (5).

15. Set handle vinyl channel (14) in place over edge of outside glass panel (17) with bottom of vinyl in line with bottom of bumper. Tap towel bar brackets (9 & 10) in place. Bracket with pull should be to jamb side of slider opposite shower head. Assemble towel bars (11) to brackets using #6 x 3/8" SMS.

16. Set handle in vinyl in place over edge of inside glass panel with bottom of vinyl in line with bottom of bumper on edge facing the wall jamb. Tap inside door pull in place. **Note:** Large Portion of Pull to Inside of Slider.

17. Silicone inside of shower where jamb meets walls and sill meets rim of tub.

**Figure 4**

*For the next thousand years.*
